FOR IMMEDIATE RELEASE

**eSCHOOL SOLUTIONS PARTNERS WITH INFOSOURCE LEARNING
TO PROVIDE WEB-BASED PROFESSIONAL DEVELOPMENT TO EDUCATORS**

Orlando, Fla. – eSchool Solutions – the leading provider of preK-12 administrative software and technology solutions – recently announced a partnership with InfoSource Learning to provide educators with a new professional development resource: eSS InfoSource.

eSS InfoSource – a web-based comprehensive content library and authoring tool – provides teachers with access to award-winning, self-paced modules. Instead of sacrificing in-class time for professional development, eSS InfoSource lets educators complete interactive lessons – complete with compelling audio, video and graphics – at their convenience. In addition, districts can easily customize content to meet local needs.

“An increasing number of school districts are implementing web-based professional development,” said Brett Fadeley, CEO of eSchool Solutions. “eSS InfoSource helps reduce lost learning days while providing relevant professional development content.”

eSS InfoSource also complements ERO, eSchool Solutions’ professional development management software. ERO gives districts the necessary tools to build course catalogs, monitor individual learning activities and track certifications.

eSchool Solutions (www.eschoolsolutions.com) is the leading provider of integrated technology solutions for the preK-12 education market. The company serves more than 600 school systems encompassing 29,000 schools in North America, providing innovative educational management software and consulting solutions.
