FOR IMMEDIATE RELEASE

eSCHOOL SOLUTIONS ANNOUNCES UPDATES TO SMARTFINDEXPRESS

Orlando, Fla. – eSchool Solutions – the leading provider of preK-12 software and technology solutions – recently announced the release of SmartFindExpress 1.4.

“This latest release of SmartFindExpress fulfills a number of requests we received from our clients – including stronger reporting capabilities and a simplified log-in process,” said John May, eSchool Solutions’ director of product management.

The most recent version of the substitute management software contains a number of enhancements – including a graphical dashboard that displays daily job availability; weekly fill rate comparisons; LDAP-compatible user log-in; and improvements to the foreign language modules. Additional changes are detailed in the release notes.

“As with any release, we underwent an extensive testing and validation process to make sure the product was ready for general availability,” explained May. “We’d like to extend our appreciation to the following school districts for their participation in this process: Academy School District Twenty – Colorado Springs, Colo; Clovis Unified School District – Clovis, Calif; Coppell Independent School District – Coppell, Texas; East Baton Rouge Parish School System – Baton Rouge, La.; Fountain – Fort Carson School District Eight – Fountain, Colo.; and Ysleta Independent School District – El Paso, Texas.”

During the coming months, eSchool Solutions will contact districts currently using SmartFindExpress to schedule upgrades. To help users get the most out of the new features, eSchool Solutions will host a series of training webinars throughout the fall. Specific dates will be announced soon.

eSchool Solutions (www.eschoolsolutions.com) is the leading provider of integrated technology solutions for the preK-12 education market. The company serves more than 600 school systems encompassing 29,000 schools in North America, providing innovative educational management software and consulting solutions.
