

## SFE Advanced Training

This class is designed for System Administrators (Operators) that have experience in their district using *SmartFindExpress*. Your district must currently be live on *SmartFindExpress* and have already received your on-site or Webinar training from eSchool Solutions. If we had to put a scale on this course from 1 to 4 and in true Texas style, using chili peppers, we would rank this as a 4 chili pepper class. This class is not for the beginning System Administrator. The Instructional Coordinators will walk you through how you can retrieve your data and create reports that you never dreamed possible by familiarizing you with the various report types that can be extracted from *SmartFindExpress* and providing real-life scenarios to enhance your learning and help you retain the information provided.

- Reports
  - Job Reports
  - Substitute
  - Employee
  
- Grouping
  - Location
  - Classification
  - Reason Menus
